HARNESS THE HEALING POWER OF HERBS

WITH TREATMENTS BY KURLAND

THE MODERN MASSAGE WITH HERB COMPRESSES UNDER CONSTANT STEAM

The combination of warmth, steam, touch with the compresses and massages provides an exceptional relaxation experience which far exceeds that of standard massages. Unlike the usual compress massages, the temperature and pleasant skin contact are permanently maintained with this treatment. While the warmth of the herb compresses promotes blood flow and loosens the tissues, the steam opens the pores and fuels the absorption of soothing oils and natural active herbal ingredients. The gentle massage also relieves tense muscles. The specially developed and patented Permanent Contour® device allows for a unique relaxation experience.

FULL-BODY DEEP HERBAL COMPRESS MASSAGE

Based on 4-elements theory, with continuous steam exposure and fragrant herbs. The session will begin with a foot massage, slowly preparing you for the deep relaxation of your Full-Body Compress Massage. You will be pampered with herbal compresses and oils that are especially tailored to your needs. Heat stimulates the blood flow and loosens the tissue. Steam opens the pores and accelerates the absorption of nurturing oils and natural herbal active substances. A gentle massage will additionally release tense muscles, for a relaxing and stress-relieving effect.
